#IME21

08 - 09 September 2021

Frankfurt am Main, Germany

LEHNER INVESTMENTS

in cooperation with:

THE ART OF ARTIFICIAL INTELLIGENCE

About #IME21

The Investment Management Exhibition (IME) is a two-day investment event of a special kind. Our concept is a unique symbiosis of conference and exhibition, which will take place on September 8th and 9th, 2021 for the sixth time in Frankfurt am Main, Germany.

Our aim for the Investment Management Exhibition is to:

- promote better economic and social partnerships;
- increase regions' competitiveness;
- enable networking between government bodies, businesses and international financial institutions.

WHAT IME OFFERS

- A highly efficient networking platform for project owners and investors in an environment-friendly economy, PPPs and the real estate, automotive, agriculture, chemical, logistics, financial services, energy, tourism and hospitality sectors.
- Networking between cities, regions and countries with individual entrepreneurs for company relocation and attracting foreign direct investment to special economic zones. This is a platform used by governments to showcase investment opportunities and meet investors.

Because of the increasing importance of hydrogen and its potential to help in building a sustainable and environment-friendly economy, at IME we have decided to organize a special panel discussion on this topic as part of the IME 2021 conference program.

Hydrogen has not yet achieved its full potential due to the costs and complexity associated with its development. But that is about to change. Due to the necessity of building a more environment-friendly and sustainable industry, governments are becoming increasingly supportive when it comes to investing in hydrogen. However, there are still some challenges in making hydrogen effective and cost-competitive, which we also want to address during the discussion.

In 2022 we will continue to incorporate this special parallel event combining exhibition and conference, focused on investment in hydrogen and space technologies.

We thank you for your contribution to making IME an effective marketplace for project owners and investors.

The UNIDO Investment and Technology Promotion Office (ITPO) Germany

As part of the UN system, UNIDO ITPO Germany mobilizes investments and technologies for sustainable industrial development. Situated at the UN campus in Bonn, UNIDO ITPO Germany supports investors and companies by facilitating technology transfer from Germany to developing countries and economies in transition.

UNIDO ITPO Germany opened in 2017 at the UN campus in Bonn. Its mandate is to foster mutually beneficial industrial cooperation between enterprises in Germany and in developing countries and economies in transition with a focus on SMEs. The mandate is aligned with UNIDO's vision of inclusive and sustainable industrial development (ISID).

It is UNIDO ITPO Germany's vision to make investments and sustainable technologies from Germany a catalyzer in achieving the sustainable development goals by 2030. UNIDO ITPO Germany contributes to this vision through the mobilization of knowhow, expertise, technology and capital from Germany, working closely with the German private sector, whose environmental technologies are internationally recognized. UNIDO ITPO Germany supports German and European technology providers and investors to find potential partners in developing countries. The office also connects companies and representatives from developing countries with providers of sustainable and innovative technologies.

UNIDO ITPO Germany Advisory Programme

Through its Advisory Programme, UNIDO ITPO Germany provides services to the private sector and governments on industry-related issues by assigning local advisors in target markets. The advisors provide potential investors and technology providers from Germany with the latest information and advice on the local investment environment to facilitate technology transfer and business matchmaking.

UNIDO ITPO Germany is establishing its Advisory Programme in four countries: Côte d'Ivoire, the Democratic Republic of the Congo, Nigeria and Sudan.

Speakers

MR. MARKUS LEHNER

HEIKO STAUBITZ

Senior Manager Investor Consulting
Hydrogen & Energy Infrastructure,
Germany Trade and Invest (GTAI)

Heiko StaubitZ has been senior manager investor consulting in the department for Energy, Building & Environmental Technologies within GTAI since 2007. He is responsible for the industrial settlement of international investors in Germany in the field of energy storage, hydrogen and smart grids. Prior to his position at GTAI, Heiko StaubitZ worked for many years as product developer in the field of renewable energies and energy efficiency at EnBW, Germany's third-largest energy supplier. He has an academic background in energy and process engineering.

DIPL. ING. HEIKO SCHNEIDER

CEO and Managing Partner
GoGaS Goch GmbH & Co. KG

"Energy efficiency has the very highest priority." Heiko Schneider has been successfully putting this entrepreneurial motto into practice since 2004 as CEO and managing partner of Dortmund-based GoGaS Goch GmbH & Co. KG. Born in 1962, Schneider studied chemical engineering at the Karlsruhe Institute of Technology and is now a recognized expert in energy-efficient and regenerative plant engineering. Under his leadership, GoGaS has developed into a global leader in the fields of heating, cooling and ventilation of industrial buildings, thermal process plants, indoor air hygiene and infection control.

"Special challenges require special solutions". Heiko Schneider's technical expertise and wealth of ideas have led to the development of innovative system solutions using state-of-the-art infrared and UVC technology – always sustainable, environmentally friendly, efficient and economical. His visionary intuition for the energy industry of the future make Heiko Schneider a sought-after speaker at congresses, for example in China, South Korea or the USA. "Community makes strong and leads to exchange, inspiration and innovation". With GoGaS, Heiko Schneider is a member of the Association of Companies for Gas and Water Technologies (FIGMA), the European Leading Association of Radiant Gas Heaters Manufacturers (ELVHIS), the Mechanical Engineering Industry Association (VDMA), the German Energy Solutions Initiative and active partner of the sustainability initiative "Blue Competence".

10:50-11:40	Plenary Session The power of hydrogen - investment of the future for a sustainable and environment-friendly industry Hydrogen has not yet achieved its full potential due to the costs and complexity associated with its development. But that is about to change. Due to the necessity to rebuild a more environment-friendly and sustainable industry, governments are becoming increasingly supportive when it comes to investing in hydrogen. As a clean energy source, hydrogen can help decarbonise the world's most polluting industries as well as fuelling our cars, heating our homes and unleashing the full potential of renewable energy. Still there are some challenges in making hydrogen effective and cost-competitive, which we also want to face during the panel. Moderator Mr. Günther Fehlinger Secretary General CEE-BC Speakers Dr. Maike Schaefer Minister, Senator for Climate Protection, Environment, Mobility, Urban Development and Housing in Bremen, Germany - Virtual Participation

Ms. Aissata Lam
Director General, Investment Promotion Agency of Mauritania

14:40-15:20

Panel discussion

How women empowerment changes the culture of investment

The increase in women's wealth and influence, coupled with increasing research to show that gender diversity correlated with better performance, has bolstered a focus on gender balance in the workplace. Recently, Morgan Stanley launched a score to assess the level of gender diversity within a company's workforce, finding that the most gender-diverse companies outperformed their regional benchmarks, while the least gender-diverse firms underperformed.

Gender lens investing - the incorporation of gender elements into an investment decision-making process - is on the rise. How is this affecting the culture of foreign investment and the decision-making of foreign investors and policy-makers?

Moderator

Mr. Günther Fehlinger
Secretary General CEE-BC

Speakers

Dr. Simone Burel
CEO of LUB GmbH in Germany

Ms. Jessica Neumann
Investment and Technology Promotion Expert at UNIDO ITPO Germany

Koroma Director General, Sierra Leone Investment and Export Promotion Agency
16:30-16:45	Coffee Break

16:45-17:05	The Future of SEZs UNCTAD's 2019 World Investment Report estimated that between 2014 & 2018, the number of Special Economic Zones (SEZs) worldwide increased by 26% to around 5,400. More than 140 countries, which include almost 75% of all developing economies and almost all transitioning economies, are home to some form of Zone. In addition, more than 500 Zones are currently in the pipeline — either being developed or developed but not yet operational. However, the classical foundation upon which the competitiveness of SEZs rests – i.e. the combination of an appealing incentive package and a real estate solution for investors – has become obsolete and is no longer sufficient to guarantee success. This panel session discusses how SEZs should start to re-think the role they can play in generating economic growth, diversifying economies, attracting new (sustainable) investments and become catalysts of a new economic growth model for countries. Moderator Mr. Günther Fehlinger Secretary General CEE-BC Speaker Ms. Zoë Harries Senior FDI & Economic Zones Advisor Partner & Director, EZDA Founder & CEO, Impact Zones & Impact Advisory Middle East Project Director, World FZO Lecturer & Public Speaker
17:05-17:20	How to use the "sixth sense" when investing Keynote Speaker Prof. Dr. Milan Krajnc He is nominated for the Nobel Prize in Economics 2021. He founded the new scientific science Dynamology, which unlocked the secrets of nature and from this created a new business model (Dynamic Leadership Model) that stimulates the natural needs of people. However, with the development of primary human needs and feelings, the world economy begins to change, because the economy is based on consumption needs. With the Dynamic Leadership Model he has structured all the processes very precisely, combining the laws of physics, psychology and implementing them in the economics of needs. He is a full professor of Public Management at the European Center for Peace and Development, the University of Peace established by the United Nations in Professor of Economic Sciences and representative of Al-Khalifa Business School in the Principality of Monaco. For the last 15 years he has been running a private practice in the field of psychotherapy. He has been solving crisis situations in companies and family businesses for 20 years. He has written more than 300 books in the field of leadership and relationships and more than 200 professional and scientific articles; the latest work entitled "Dynamic Leadership Model" has already been translated into 11 foreign languages and is still being translated into several languages.
17:20-17:40	Baden-Württemberg as an attractive location internationally – now and in the future BW_i brings business and science to the global markets and positions the state as an attractive location internationally – now and in the future. As central location marketing agency for business and science in and for Baden-Württemberg, we see ourselves as an organisation that shapes the future using a proactive and integrated approach and makes a key contribution to the development of a state that is progressive and fast growing in the areas of business and science. Our mission is to make Baden-Württemberg even more visible, attractive, and resilient in the face of global competition as a location for business and science, to attract new stakeholders and to strengthen, support and assist local companies and scientific institutions on their internationalisation journey.

	Speaker Ms. Cornelia Frank Head Of Department International Economic Cooperation and Location Marketing at Baden-Württemberg International
17:40-18:00	Investment culture in Western Balkans and Eastern Europe Speakers Mr. Günther Fehlinger Secretary General CEE-BC Mr. Jürgen Reizner CEO, Administrator, Steinbeis-Transferzentrum Ost-West-Kooperationen
18:00	End of the first day

Day 2 – Thursday, 09 September 2021

09:30-10:00	Welcome Coffee and light breakfast
10:00-10:20	Keynote presentation How to access public funds for investment Speaker Mirko Twardy Head of Business Development Financing and Promotion at the Company: Dr. Kakuschke & Partner AG
10:20-10:40	The role of professional structures through the power of media as a dimensional act of success. Speaker HE Denisa Gokovi Founder & CEO at Hoinser Magazine

10:40-11:00	Germanys Mittelstand The Mittelstand is often described as the heart of Germany's economy – and rightly so, given that mid-sized firms account for the largest share of the country's economic output, employ about 60 percent of all workers, provide crucial training, and contribute significantly to corporate tax revenues in Germany. Speakers BVMW – Bundesverband mittelständische Wirtschaft, Unternehmerverband Deutschlands e.V. Mr. Reinhold von Ungern-Sternberg Director International Markets Reinhold von Ungern-Sternberg is responsible for international relations at BVMW since January 2020.

12:00-13:20	Lunch and Networking
13:20-13:40	Keynote On the way to a renewable hydrogen economy: Technological challenges and economic opportunities in Hessen Speaker Mr. Jens Deutschendorf State Secretary, Hessian Ministry of Economics, Energy, Transport and Housing
13:40-14:25	Panel Discussion Invest in Africa – Invest in the future - Part III Green energy, sustainable agribusiness, modern manufacturing – the future is now and it is African. Markets in Africa provide more investment opportunities than ever before that attract the attention of innovative businesses and technology providers: How can the abundant resources of wind and sun be turned into renewable electricity? In which way will modern technology establish sustainable food value chains? And how can the mining of natural resources be used to improve infrastructure and to attract value added production? Speakers from Congo, Kenya, Mozambique and Angola will discuss these and other investment opportunities in their region. Moderator Ms. Lea Spoercke UNIDO ITPO Germany

	Speakers Hon. Dennis K. Waweru Chairman, Kenya Investment Authority Mr. Nuno Maposse Senior Investment Expert, APIEX Mozambique Dr. Lello Francisco Member of the Board of Directors, APIEX Angola Ms. Rose Doree Bokeleale Deputy Managing Director, National Investment Promotion Agency, DR Kongo Ms. Saida Kahouli Director Germany, Foreign Investment Promotion Agency (FIPA) Tunisia
14:25-15:00	Panel discussion Business and investment activities in Latin America Speakers Mr. Gustavo Weigel (virtual) Weigel Finanzas Corporativas, Uruguay Mr. Miguel R. Solis Avalos Commercial Advisor, Embassy of Guatemala in Germany Mr. Carlos Andrés Alvarez Senior Advisor Foreign Investment, PROCOLOMBIA Germany
15:00-15:30	FDI 4.0 as a new model for competitiveness and economic growth The convergence of a number of challenging developments and forces is taking place globally and being accelerated by Covid-19: declining FDI flows and heightened competition for FDI, digital transformation and Industry 4.0. These developments can also create many opportunities for countries in the nearby future. Countries can (re) define strategies and tools crafted to respond to these opportunities and create growth engines that both support the future of trade, economic growth, employment and decent jobs. Yet unlocking such opportunities will require governments and IPAs to rethink traditional approaches to FDI in general and the promotion and facilitation of FDI in particular and develop a new approach, FDI 4.0. This panel will discuss how policymakers can rethink economic growth, competitiveness and redefine existing models of FDI re-develop new innovative solutions that change the competitive and economic landscape of their country. Speaker Mr. Douglas van den Berghe CEO, NxtZones and FDI 4.0
15:30-16:00	Price giving and Closing Remarks of the IME 2021 Mr. Markus Lehner Principal of LEHNER INVESTMENTS Closing of IME 2021
